Canada – The Land of Milk and Honey

Canada, the land of milk and honey.

Immigrants come here for greener pastures

To find good jobs

And provide for their families.

Canada, the land of milk and honey.

Government uses the people's taxes to good usage;

Good roads, solid education, health care, etc.

To others, it is just a fantasy.

Canada, the land of milk and honey.

A place that guarantees eligibility for

Canadian citizenship within 3 years

And also allows dual citizenship.

Canada, the land of milk and honey.

A place with diversity, so you're not alone.

With over 250,000 new comers every year.

We are a big family, filled with every culture.

Canada, the land of milk and honey,

Where the rights of the people are protected.

It is the 8th safest country in the world.

Citizens think so and so does the rest of the world.

Canada, the land of milk and honey,

Where immigrants are not only welcomed but also needed.

With its grand land mass and low population,

Immigrants are needed to maintain its population growth.

Canada, the land of milk and honey,

Where the economy is strong and stable,

Making it the 10th largest economy in the world.

So why not come down to Canada?

Summary of the Poem

Canada is filled with so much opportunity, it would be considered insane for an immigrant not to come. In Canada, immigrants are welcomed with opened arms which is not common around the world, this also adds to the advantages of coming to Canada as an immigrant. There's free

health care, roads, public utilities, schools, economic development and cultural activities (Settlement).

It is a county filled with different cultures, race and religion which makes it extremely diverse compared to other countries, with over 250,000 immigrants coming in every year which is considered double as the immigrants in the U.S. (Canadim). Due to its low population and extremely large land mass, immigrants are highly depended on for population growth.

Immigration brings along cultural diversity which promotes tolerance in Canada, new languages, cultures and religions. This forces to be more open minded in terms of other cultures. Canada then becomes home to all around the world, a place where they come to find greener pastures to provide for their families both in Canada and in their home country.

Due to the free health care and education, it is a lot more affordable and accommodating for immigrants, they also get to enjoy the benefits in Canada. Job opportunities are available in abundance especially in factories and full time workers get benefits that could protect them and their family. The government also pays parents money per child in order to provide for them, this is also one of the advantages.

Immigration also promotes globalization which stimulates Canada's global economies. Many immigrants come into Canada every year, therefore increasing Canada's international influence. This helps the economy stronger and better than it was before. Immigrants should really consider moving to Canada because there are so many opportunities for them.
